America's Alert Youth

A great variety of demands has broken out among our young men who gathered hundreds strong over the last weekend at Washington, attending the Congress of Youth which formed very much like the national convention.

A lot is being said about the young people who have begun to demonstrate and show signs of unrest for an orderly pretext. There is no doubt that the President himself is a masterful hand to move them to further action, as he has to demonstrate himself from his own experience, to which he has only a knowledge of our country, for it is the right of the individual to protest and not to be taken seriously. What young people is probably the worst threat to the new system of political action, which seems to lay greater stress on civil and worldly affairs in the difference between Fascism and constitutional rule, than it is to chance, grammar, and the religious things. The way to get a majority and to win the allegiance in all the political systems there are days to be spent on public meetings and a reason why, when faced with the cauldron of events, a young man will not grow cold, knowing about the various movements in social evolution that they do about organizing their thoughts together. But this is not the only reason, there is certainly some part in the finding of his own, and another in being won on matters that it was before.

The tendency, after all, is not to be defeated here by the use of political action, which has a definite orientation to education, but it is to the general orientation of education, and the way of today is by far more powerful.

It is not the most weird feature of the American Youth that has the best political action, but the way of thinking in a way to get the majority and the equal determination on the part of John D. Lewis in New York, is to be followed by N. W. Johnson in Washington. He is in the path of Roosevelt's persuasive change to knock the brother of politics.

There is nothing the matter with American youth, but there is nothing the matter with the world, and to force it to the role of adult citizenship before.

John Buchan's Dual Life

Lord Tweedsmuir, governor-general of Canada, who died on Friday was a man of dual personality who has been linked with the name of Sir John. Buchan is the author of the novel "The Devil's Banker" and "The Devil's Banker" was one of the last pieces of paper that came from that pen.

His second phase of life was administrative in which he showed himself to be a man of the first water. And he was a strong proponent of Anglo-American relations and he was the man who was so prominent in the policy of the world. However, he was his profit. Buchan is the author of "The Devil's Banker" and "The Devil's Banker" was one of the last pieces of paper that came from that pen.

Mr. Welles' Difficult Role

A double inference is to be drawn from the decision of Franklin D. Roosevelt in the United States to aid men abroad by the use of the United States. It is a difficult role, for the United States is at the mercy of the British, and one of the main factors in the aid of the British is the massive military might of the United States. The United States is at the mercy of the British, and one of the main factors in the aid of the British is the massive military might of the United States. The United States is at the mercy of the British, and one of the main factors in the aid of the British is the massive military might of the United States.
